Mockup Review Notes

1. Hover with animations, enlarge (on navs too)
2. Animation with fly-in effect on the bottom of the first page
3. Fonts: more hand writing-ish, less blocky
4. Add opacity / overlay on the page, header images, make that section larger
5. Keep the contents, try to add animation to the images
6. Bigger images, description over a transparent-colored background, following website has good example:
